

JOIN IN REAL-WORLD LEARNING WITH A COMMUNITY OF PEERS

The Learning Academy is an initiative of the School of Europe Tbilisi (legal project name Eastern Partnership European School), funded by the European Union and the Ministry of Education and Science.

Our mission is to prepare potential education leaders, teachers and innovators who, in line with the Vision of the MoES, will be agents of change to improve education and meet the requirements of authorisation in Georgia. Our rich suite of three Modules each lasting two and half days is carefully designed to incorporate the best learning practices to develop your knowledge and skills and prepare you for your own personal career pathway. The development of the Modules is a result of a collaboration between international experts and local education experts. Together, they bring a wealth of knowledge and experience, combining the best global practices. The highly interactive workshops will be facilitated by the expert mentorship of our exceptional local and international workshop leaders. Participation in this programme is free.

We invite you to join Module 1 at the Sheraton Hotel from the afternoon of 23 - 25 February 2024 as part of the first cohort of sixty participants. This Module starts the journey which will prepare you to make a difference in education today. You will build a rich network of peers and mentors and have the opportunity to learn new classroom techniques, deepen your knowledge and concentrate on specific areas of interest. Because our approach is modular, you will build up your knowledge as you go. Once you complete a module you will have the opportunity to join the Learning Academy Learning Platform, a virtual space that connects our participants to share information and resources and support each other's learning. The platform is designed to facilitate collaboration, discussion, and knowledge-sharing among its members and local and international experts.

Enhanced capabilities at the end of Module 1

- Self-directed learning/growth mindset
- Relationship-building/collaboration
- Reflection and goal setting
- Impacting student learning
- Resilience/solution-focused approaches

Learn more about our three-module programme below:

Each module will be a mixture of plenary sessions, group, and individual work. In addition, each participant will have a personal assignment.
